

Refinery to Aaron Halo Mining Routes

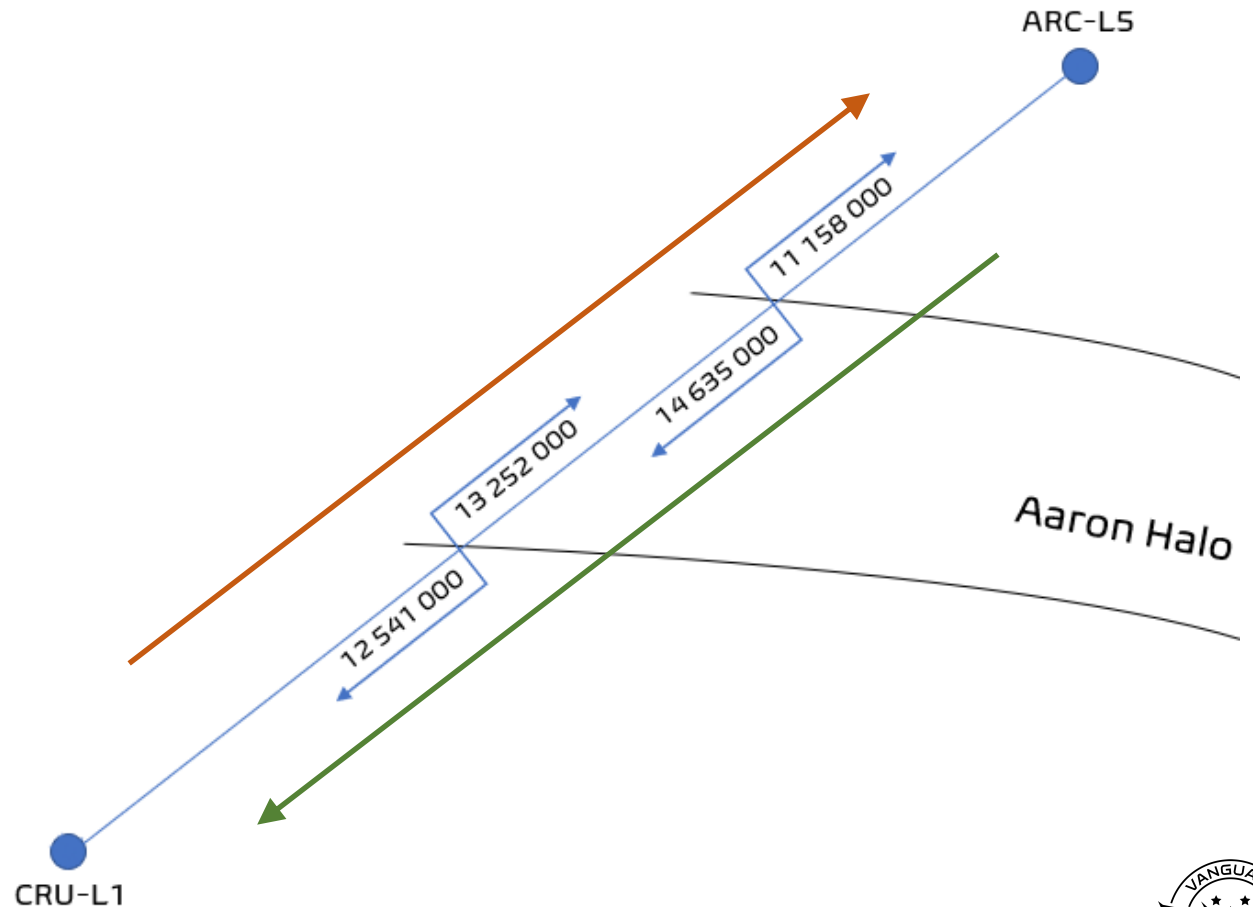

The following charts show distances to the edges of the Aaron Halo asteroid belt along various routes, with the refinery R&R stations as center point.

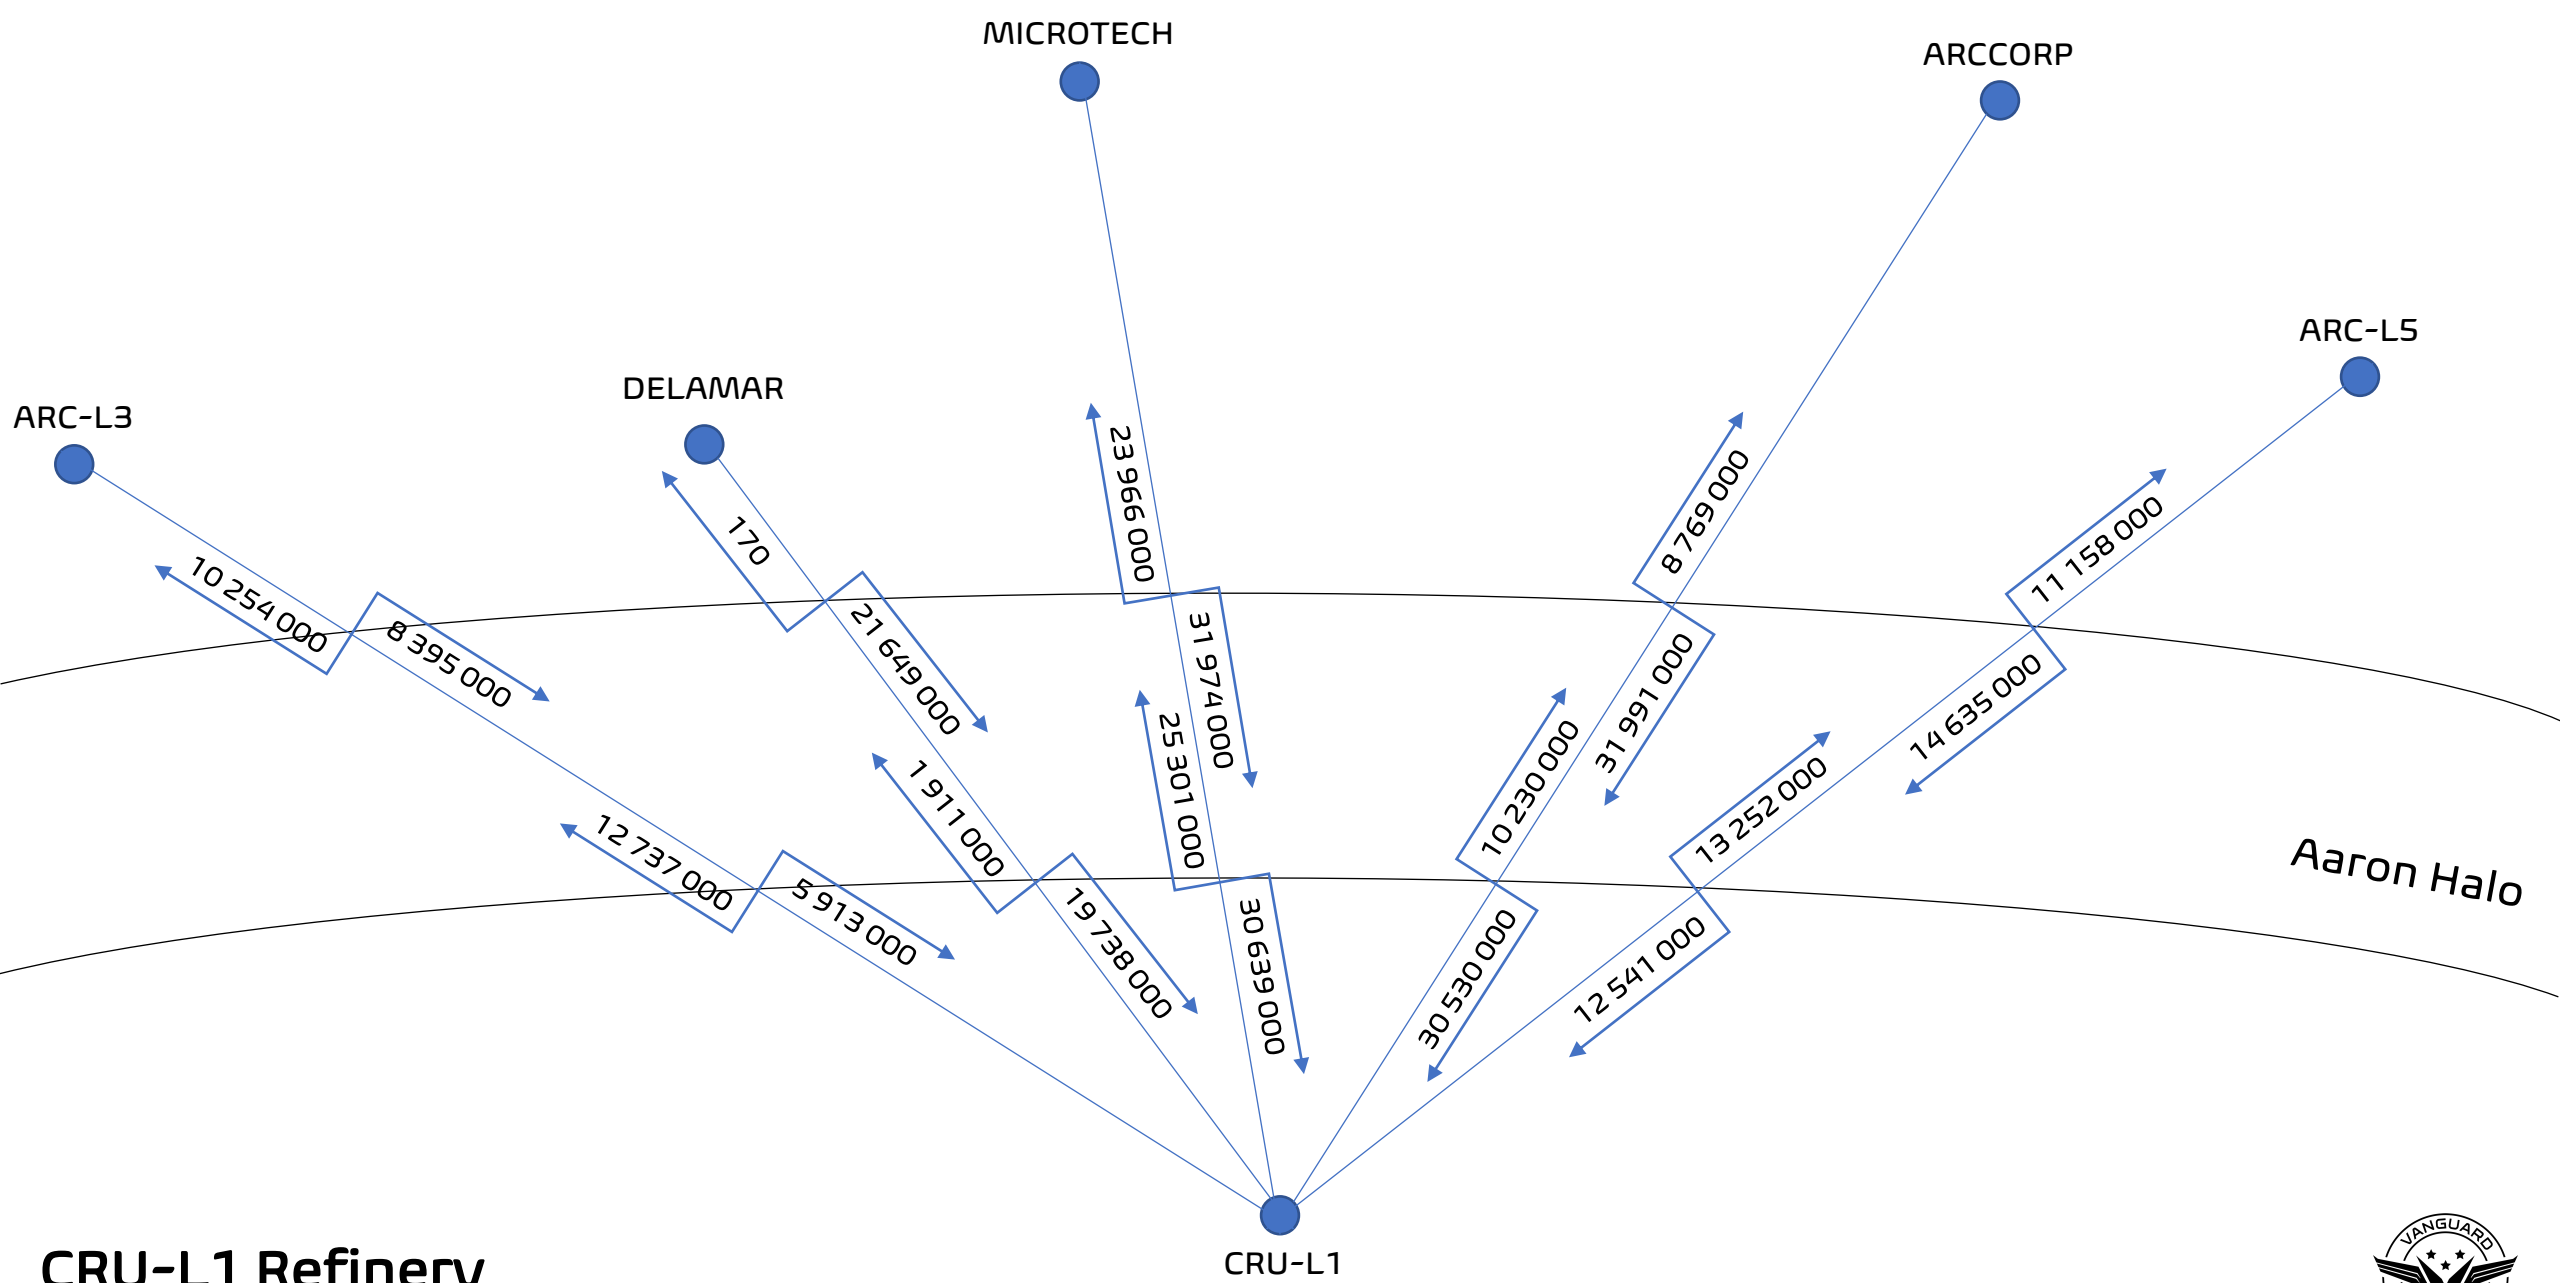

To reach the asteroid belt, exit quantum travel between the specified edge distances of the travel route.

Example:

When travelling from the CRU-L1 refinery station towards ARC-L5, exit quantum travel when the distance to ARC-L5 is between 13 252 000 km and 11 158 000 km.

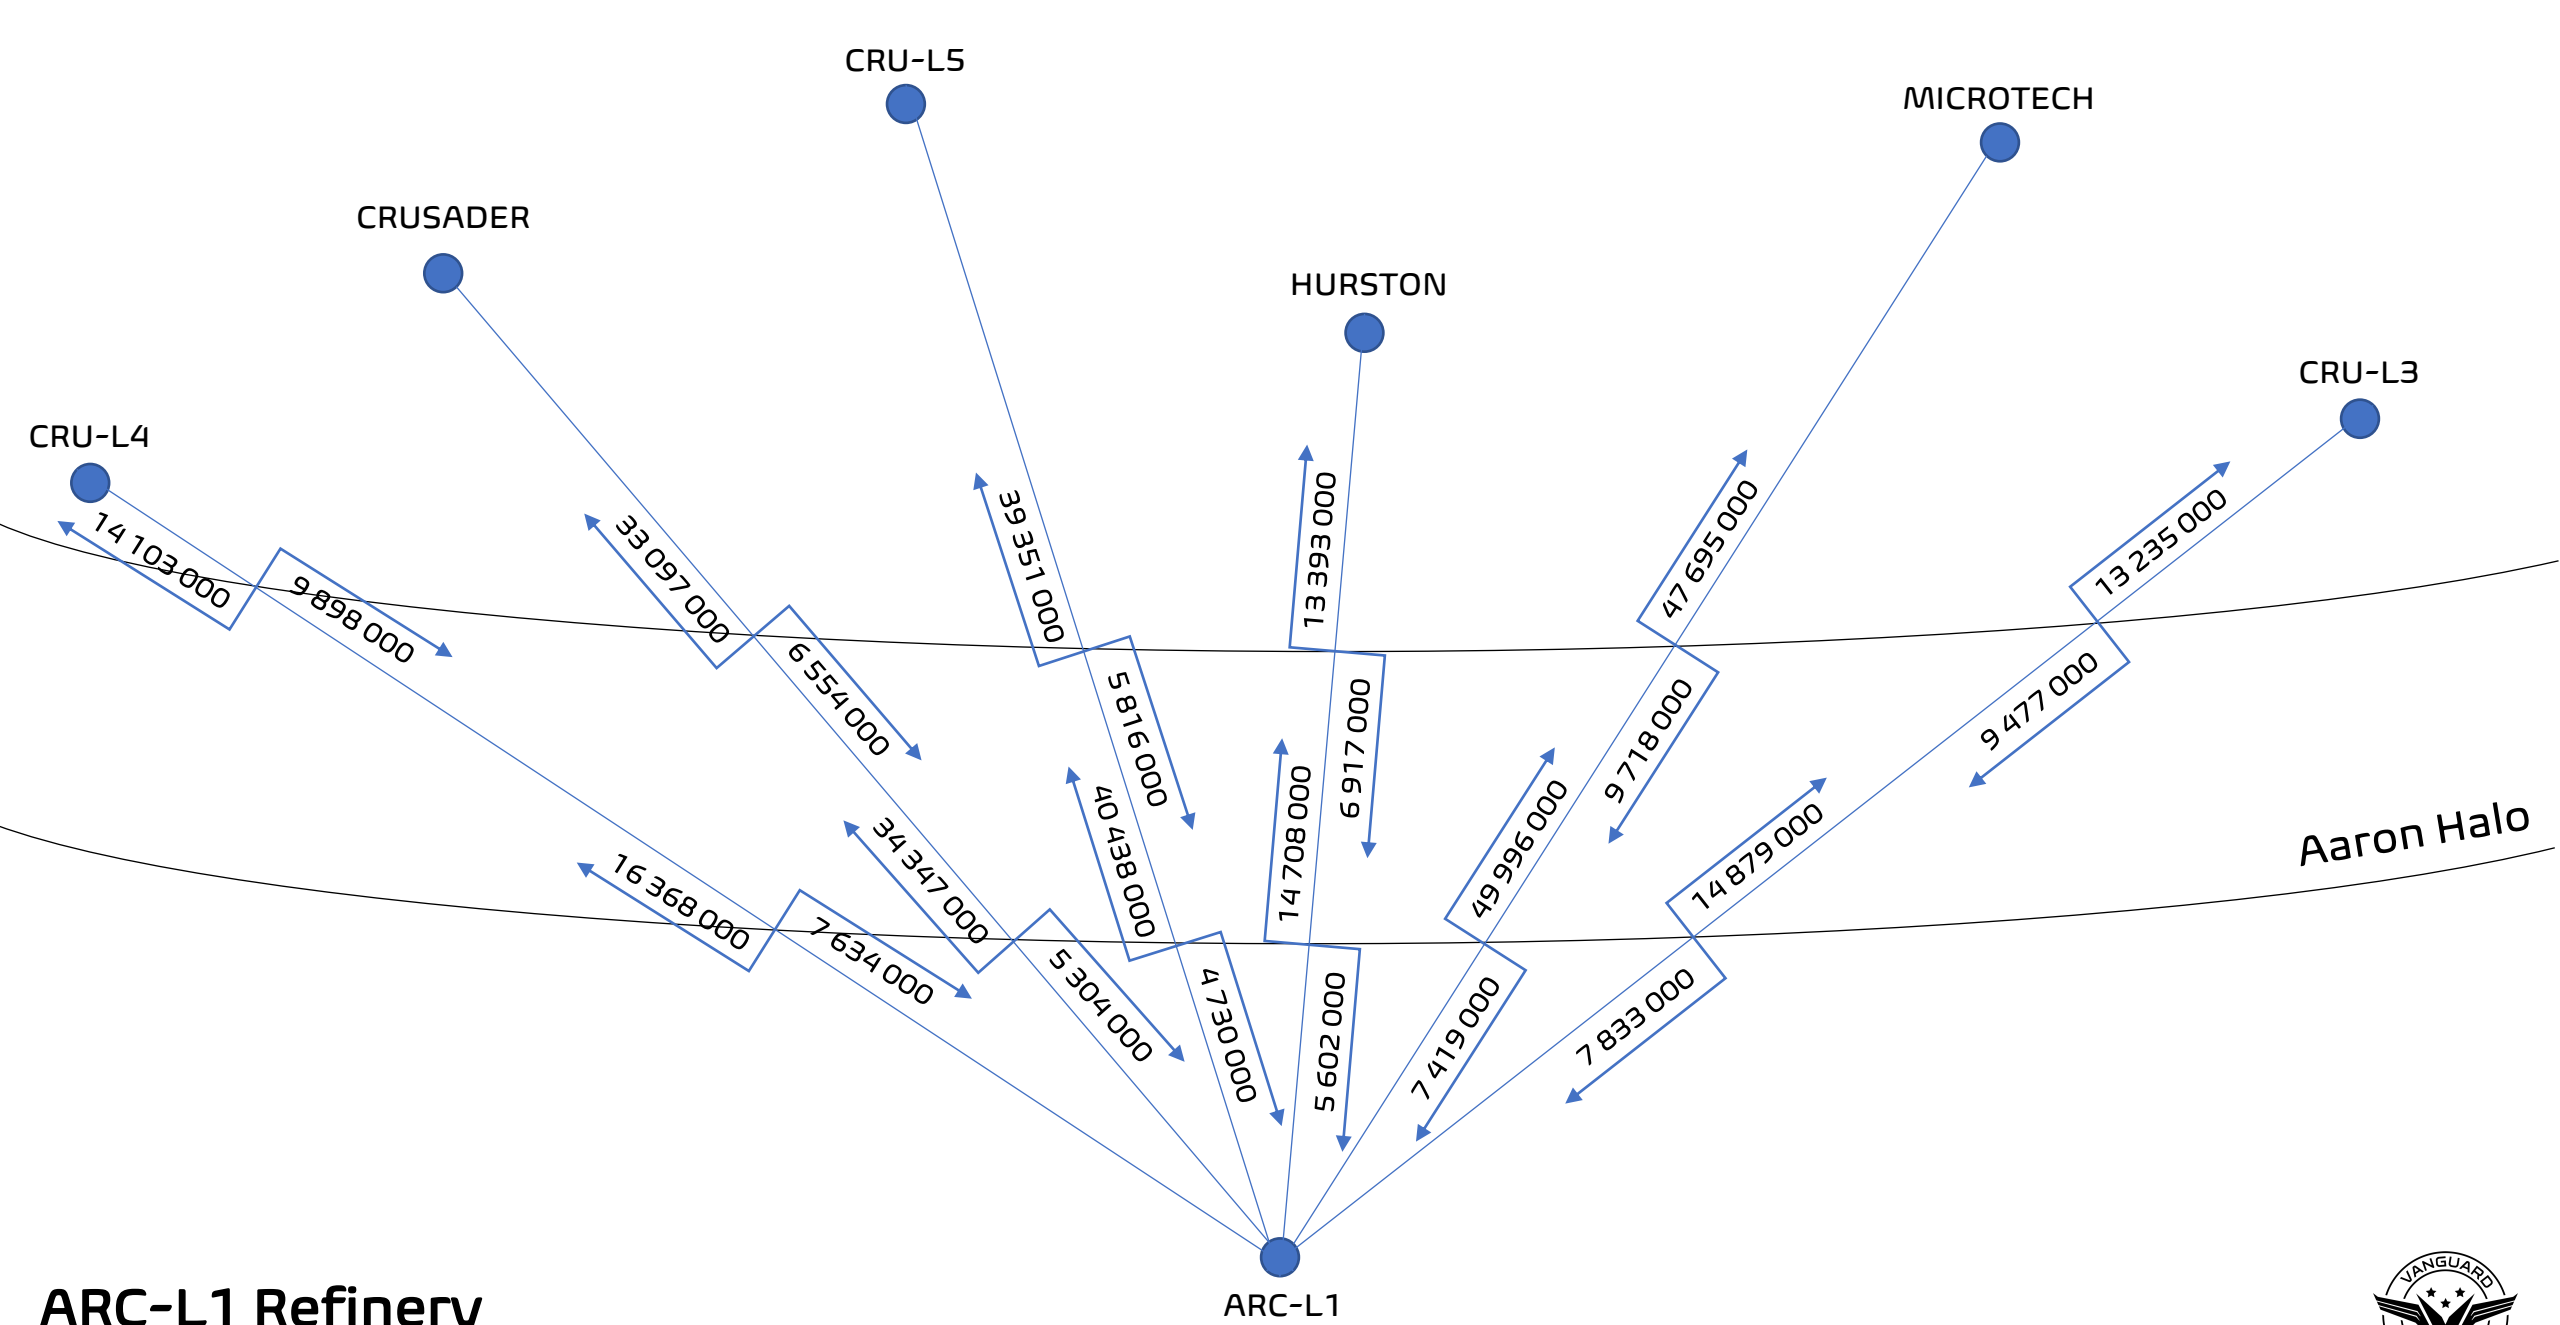

When travelling from ARC-L5 towards the CRU-L1 refinery station, exit quantum travel when the distance to CRU-L1 is between 14 635 000 km and 12 541 000 km.
